

隧道式脫磁器及充磁器

TUNNEL-TYPE MAGNETIZER & DEMAGNETIZER

GMD-□ GMD-○

用途：

- 適用各種工具鋼、特殊鋼、鐵類及小型多量工件之充脫磁。

特點：

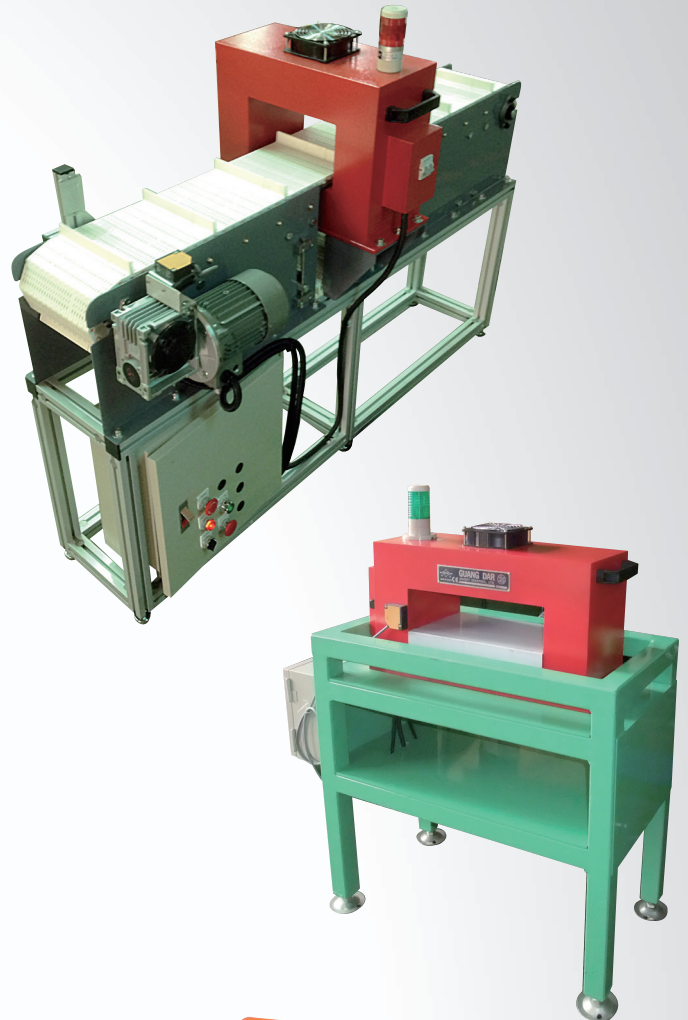

- 脫磁時只要通電後，工件從中間孔穿過即可達成脫磁效果。
- 適合規劃自動化流程，配合非導磁體輸送帶工作，提高生產力，如指南針、螺絲起子等之脫磁作業。
- 可長時間使用。
- 充磁器需配合控制箱使用。
- 使用簡單方便，可依實際需要訂製型式、規格。
- 可配合電眼做自動控制。
- 可設計各種電壓。

APPLICATION:

- Suitable for magnetization/demagnetization of various kinds of steel, iron and small-type workpieces.

FEATURES:

- Immediate demagnetization is available when workpiece passing through the central hole after power supply.
- Be able to assist for process automation in nonmagnetic belt conveyor operation to enhance productivity, such as magnetization/demagnetization of screw drivers.
- Available for long-time use.
- Magnetizer should be used with control box.
- Easy & convenient use.
- Special type & specifications are available upon request.
- Automatic control is available with photo sensor.
